HOW IT WORKS:

Text and audio prompts guide students through modeling (Read Along step), repeated reading (Practice step), and progress monitoring (computer-generated graphs of student scores), maximizing their time on task. Students work in Read Naturally SE three to five times a week for at least 30 minutes a day.

Steps of the Program

1. Select a Story
2. Key Words
3. Prediction
4. Cold Timing (with computer-generated graph)
5. Read Along
6. Practice
7. Quiz Questions
8. Retell or Word Lists
9. Pass (with computer-generated graph)

WHAT'S INCLUDED

Student Stories

- Pictures, animations, and sounds engage students and provide feedback.
- Professional recordings synchronize with the story text during the Read Along step.
- To develop vocabulary, students hear important words pronounced and defined.
- The software automatically calculates reading scores and evaluates multiple-choice questions.

Teacher Management & Utilities

- Easily customize the steps to tailor the program to each student's needs.
- A placement program automates the process of determining the best level and goal for each student
- Built-in reports track students' progress and indicate when adjustments are needed.
- Database utilities enable you to import, back up, and manage data.

Manuals & Online Help

Online help, Teacher's Guide, Software Guide, Answer Guide, Quick-Start Guide, Level Installation Guide

Tech Support

- Free e-mail support
- Free software updates
- Free web support including a knowledgebase
- Free phone support for one year after purchase (available after the first year on a subscription basis)

TYPES OF LICENSES

Stand-Alone License

Software is installed locally on one computer. Student data is stored locally. Student stories are read from CDs in the CD-ROM drive.

Network Plus School Server

Software is installed and managed from a server for an individual school. Stories and student data are stored on the school server. Client software is installed on each workstation.

Network Plus District Server

Software is installed and managed centrally from a district server across multiple schools. Stories and student data are stored on the district server. Client software is installed on each workstation.
