

Have You Seen These Animal Tracks?

Story 1

Review Key Words

cats
bobcats
rabbits

Write a Prediction

Rabbit

Bobcat

Badger

Black Bear

Read the Story

6 Rabbits are fast. Look for their
13 tracks in your backyard. Look on the
22 bank of a hill. You will see two long
29 tracks and two short tracks, like dots.

35 Raccoons can be found in the
42 woods or in town. Their tracks are
48 like handprints. Each one has five
50 long nails.

56 Muskrats run fast to their marshy
63 habitat. Their tracks look a bit like
65 fall leaves.

71 Badgers go out at night looking
for food on the prairie. Their two

78 tracks cross over each other. They
84 have long nails.

87 Bobcats are five times the size of
94 a housecat. They live in the hills.
101 Their tracks look like a house cat's
108 tracks, but bigger.

111 The black bear walks through the
117 woods looking for summer fruits.
122 She visits your campsite to see what
129 scraps are left from dinner. Her
135 tracks look a lot like your footprints.

Cold Timing Score: _____ Final Timing Score: _____

Answer the Questions

1. Name four animals from the story that leave tracks.

2. Which animal lives in a marsh?

3. Which animal has tracks that are long and have dots?

4. What word from the story means the same as footprints?

5. Write a sentence telling how the tracks of badgers and raccoons are alike.

Number Correct: _____
