A killer bug may be hiding in your garden. Don't worry, though. You are not its prey. This killer bug eats other bugs! It is called an assassin bug.

The assassin bug is sneaky. It hides and waits for its prey. Soon, another bug comes close to it. The assassin bug makes a surprise attack. It stabs its prey with its sharp beak. The beak injects a poison into the bug. The poison kills the bug. It also turns the bug's insides to liquid. Then the assassin bug gets its meal. It sucks up the watery guts using its straw-like mouth.

If you get too close to an assassin bug, it might

Did You Know?

Congratulations! You finished all the stories in Bugs!

Did you know...?

Some assassin bugs have sharp hooks at the ends of their legs. When the assassin bug catches its prey, the hooks dig into the prey so that it can't get away.

Dust mites do not drink water. They take water in through their bodies.

If your pillow is two years old, about ten percent of its weight could be made up of dust mites and their waste.

Cicadas are harmless. They do not sting, bite, ruin crops, or carry disease.

Male cicadas sing in groups of up to 1,000. Their singing can be as loud as a rock concert!
